

## Need a full audit

This comment is about the statement made by Clyde McLemore regarding the Zion Township supervisor. It's funny that his point is quickly written off as false yet, people are still waiting for answers on the article. One must wonder what really goes on at the township office and what might not be in compliance. I think a full audit would be very interesting and eye opening for the public who really want to know what's happening with their tax dollars. There are so many people losing their homes, so where's the help? It's time for some fresh leadership.
